Business Law for Accountants Self-Study Webinar (2 Hours)

SO138223E
SO1382

Self Study Webcast
Dec 20 - Dec 21
Overview:
Business law has changed dramatically in recent years. Are you still up to speed? Accountants need a current working knowledge of key business law concepts to spot potential problems and avoid legal land mines. This self-study webinar provides a refresher and update of the most common legal issues you're likely to confront.

Objective:
To provide the accountant a refresher on legal issues frequently encountered by businesses. You'll be equipped to identify and resolve issues before they become expensive problems in such areas as contract law and tort liability. All concepts are clearly explained from a business standpoint.
Detailed Learning Objectives [1]

Emphasis:

- Court system and litigation process
- Contract law, including contract interpretation and governing law issues
- Tort law, including negligence and liability

• Identify the primary method of conflict resolution prior to the establishment of modern legal concepts.

• Identify the primary characteristics of injunctive relief

• Recognize the differences between procedural law and substantive law

• Recognize those entities legally entitled to create administrative law

• Recognize the cases over which the Federal courts have jurisdiction

• Identify the term used to describe the place where a legal action will occur

• Identify the term used to indicate the individual or entity that initiates a lawsuit

• Recognize examples of implied contracts

• Recognize transactions that fall under the statute of frauds

• Recognize the legal duties between a principal and an agent

Bottom **Prerequisite:**
None.

Preparation:
No advance preparation required.

Level of Knowledge:
Overview.
