

Cybersecurity in a Business World Impacted by COVID-19 Self-Study Webinar (2 Hours)

SA38120F
SA381

Self Study Webcast
Jun 9

Overview:

As the business world continues to adapt to the impact of COVID-19, cybersecurity is now more important than ever. Companies must deal with unprecedented threats, and make difficult and complicated decisions in order to survive. This self-study webinar tackles the complexities of a quickly changing business world, and what that means to the security of your company. In this new webinar, we will:

- Discuss the security implications of unprecedented layoffs
- Explain ongoing developments in Cloud security and Artificial Intelligence
- Examine risk management and security, including international risk

Objective:

To create awareness of the changing conditions and threats in business that affect cybersecurity amid the impact of COVID-19, and to prepare companies for the evolving security threats they will face.

[Detailed Learning Objectives](#) [1]

Emphasis:

- Handling recently laid-off staff
